Below 55 of what number...don't share this with ANYONE but here is a comparison of the SSVR districts. Nixon map drops it by the current benchmark of 29 to 27.

As far as Republican seats, he is overreaching. He drew two seats in Travis and both were lost by McCain and Perry.

Do y'all have the data on # VRA and # of GOP under 55% comparison between Solomons/Nixon State House Plans for Lamar? See below. If y'all are too busy, just let me know and I can load it up and do the counts, but with 300 districts between the two, I thought I'd ask to see if you had that already.

Thanks

EO

Met w tea party folks in sa this morn. They brought up st house redist and favor the nixon map over the solomons map bec it creates more gop dists. I told them re vra and asked them to ck to see how many of nixon dists were below 55. I didn't kno answer but wanted to raise questions about it. Is solomons map better in that regard.

I don't think we mess with quico's district--for your sake and his. His is barely performing (or not depending on your measure) right now; add Rs (which will be Anglos) and you put a neon sign on it telling the court to redraw it. Bring down your numbers and you'll have a Dem opponent every time. And they won't be Lainey Melnick.

Subject: Re: Special Session Proposed Map CD 24

Eric, one change, it's easy, no population. My grand babies go to Hockaday School on forest lane AND Inwood. I have the north side of forest , Pete has the south side. Please go across the street and pluck the campus out of Pete and put in my district. There will be no population.this agreeable and I will ask Burt to do it. Thanks km

On May 31, 2011, at 12:12 AM, Eric Opiela <eopiela@ericopiela.com> wrote:

Congressman Marchant-

The House and Senate have reached a compromise between their congressional redistricting maps today. The House and Senate consensus congressional proposal will likely be released today; Congressman Smith wanted me to describe your district under the proposal to you. Note that the House and Senate are still working on minor changes, and I will update you if your district changes. CD 24 will be 58.4 % McCain and will contain the following counties (100% unless otherwise noted): Dallas (14%-330,826), Denton (17%-112,782), and Tarrant (14%-254,880). As we discussed today, it's largely the same district proposed in the delegation proposal.

Please let me know you received this and do not hesitate to call or email if you have any questions.

Eric

MALDEF reaction

The Mexican American Legal Defense and Education Fund was not impressed.

"The Solomons-Seliger map does not increase the number of Latino-opportunity congressional districts despite the fact that 65 percent of the state's growth over the past decade was comprised of Latinos," said Nina Perales, MALDEF's vice president for litigation. "Instead, the map gerrymanders more than 9 million Latinos in Texas to make sure that we have no more electoral opportunity than we did in 1991."

How would you like to handle. Sally Shannon can get us the contact info looks like reporter is Cameron Joseph. If we get info telephone number and email would you like Sally Shannon or Eric to call. They might ask a lot of questions and not sure if they will give us their source or would it be better for Gerardo or his press team to call since he is part of the team that did consensus map. Seems that might be best.

Subject: CD 21 Blanco

Talked to Lamar last night. He's willing to give up Blanco County to CD 25 (or if you need it to Conaway to make the San Saba/Mills swap work so you don't have to split Burnet) to allow y'all a wider transit through Hays to make it look better, so long as the numbers stay the same. Just wanted to put that out there as an option for y'all.

Good luck at the hearing today.

Heads up, I just got a call from Doug Centilli from Cong. Brady's office. The Woodlands was removed from CD 8 and put in CD 10 under Plan C130. Is the best way to fix this for Sen. Williams to offer an amendment to Plan C130 in committee tomorrow?

gi-

could you please get me the political and hcvap reports for c130, if possible tonight? I'm sending out a delegation update, and would rather provide the RedAppl political data rather than mine because your numbers are higher due to the way redappl splits vtds (it doesnt take into account turnout when disaggregating vtd data to the block level). if not, that's fine, but I'm trying to prevent the grousing about how low cds 10 and 21 are....

thanks

If it was taken out, it wasn't intentional. But follow up with Doug on one specific request in that area.

I just talked to Doug and suggested that he work with Eric to draft an amendment and have one of the Senators offer it in Committee. I think this was an oversight on our part. Ryan let me know if I'm missing anything.

The American Community Survey provided estimated citizen voting age population (CVAP) data at the block group level in a Special Tabulation. All block groups with more than 50% of the population in a district are included in the analysis.
MOE = Margin of error at 90% confidence level
% HVAP = Hispanic voting age population / voting age population
% HCVP = Hispanic citizen voting age population / citizen voting age population
SSVR = Spanish surname voter registration
